Description

Staple spun 100% meta-aramid sewing thread that offers outstanding resistance against heat up to flame temperatures of 371°C. Fire retardant protective garments require the highest level of security and durability to protect fire fighters, industrial workers and military combat personnel. Spun meta-aramid sewing thread is used in a variety of protective wear applications such as fire fighters clothing, work wear uniforms and army combat suits and is certified to meet all safety regulatory standards like NFPA, EN and military specifications.

Main Uses

Flame retardant protective clothing
Protective wear
Military protective wear
Protective footwear
Technical applications
Filtration
Flame retardant embroidery products

Features & Benefits

XM Garment Artex Threads delivers excellent strength, durability, seam appearance and superior sewing performance due to its special finishing
Sewing threads made from meta-aramid fibres do not melt, they are inherently flame retardant (carbonises at approx. 370°C), self-extinguishing and offer very good chemical resistance
