Description

SONORA-185 AS - 185 g/m² – 80% Cotton /19% Polyester /1% AS – FR-Plain 1/1

<http://xmfireline.com/en/products/sonora-185-as-detail.html>

XM FireLine Flame Retardant fabric Sonora-185 is a light protective fabric for hot climate made of 80% COTTON/20% POLYESTER with flame retardant finishing.

The areas of use might be Transportation of Oil & Gas (pipelines workers), Petrochemical (refineries staff), Utilities (Electrical/Water/Gas service companies personnel) etc. High quality cotton rich blend, improved by addition of polyester, provides that Sonora-185 FR-fabric combines comfort of natural fibers and durability, higher tear resistance and better colorfastness of polyester.

Sonora-185 AS has high quality Belltron antistatic yarn embedded in its structure. This carbon grid gives to the wearer extra protection against Static Electricity sparks, which might be dangerous in explosive atmospheres of Refineries or Oil Terminals.
